

PRESS RELEASES

ASTG and GEM have entered into a financing agreement totaling SEK 30 million. GEM also receives 15 million warrants with a term of three years at a price of SEK 0.10

The agreement means that Advanced Stabilized Technologies Group AB (publ) ("ASTG") is entitled to request that Global Emerging Markets Group ("GEM") subscribe for shares in ASTG through a number of targeted new issues over a period of three years. In accordance with this agreement, GEM has undertaken to subscribe for new shares in ASTG up to a value of SEK 30 million. Each new share issue will be based on the average trading volume over a period of 15 days prior to ASTG calling for subscription. The subscription price will correspond to 90% of the 15-day volume-weighted average share price.

In addition, GEM is secured 15 million warrants in ASTG with a subscription price of SEK 0.10 share and a maturity of three years.

In a comment, says ASTG's chairman Fredrik Nygren "The agreement with GEM sends an important signal to both existing and potential customers and clarifies that ASTG, despite being a relatively small player in the market, can with our financing agreement with GEM fulfill our commitments as counterparty".
